Professional Summary

Technical Product Manager & AI Architect specializing in agentic workflows and fully autonomous enterprise systems. I design and implement AI agent ecosystems capable of managing prospecting, support, sales, compliance, and fund disbursement without human intervention, featuring self-healing architectures and continuous operation.

With 7+ years of industrial process engineering, I apply operational rigor and systemic vision to AI product design, connecting efficiency, governance, and scalability. I deliver "zero to one" transformations in extremely short cycles: autonomous MVPs production-ready, generating OPEX reductions of over 40% and eliminating critical human bottlenecks.
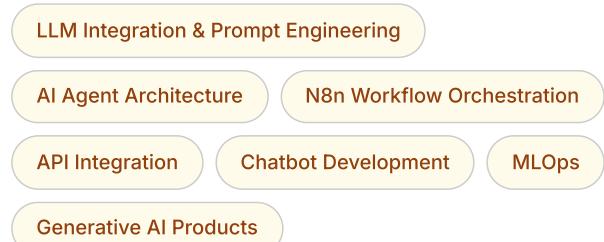

My style combines product strategy with hands-on execution, utilizing Low-Code/Pro-Code stacks (n8n, JavaScript, GCP) to validate logic, accelerate time-to-market, and orchestrate AI agents with security and reliability. This hybrid approach allows me to act as a bridge between business and engineering, translating strategic objectives into robust, measurable, and KPI-oriented architectures.

Technical Skills

Product Management

Product Discovery   Roadmap Strategy

User Story Mapping   Agile/Scrum/Kanban

MVP Development   Rapid Prototyping

OKRs & KPI Tracking   Stakeholder Management

Product-Market Fit

Artificial Intelligence & Automation

LLM Integration & Prompt Engineering

AI Agent Architecture   N8n Workflow Orchestration

API Integration   Chatbot Development   MLOps

Generative AI Products

Development & Infrastructure

JavaScript   HTML5/CSS3   SQL   Playwright

Git/GitHub   RESTful APIs

Google Cloud Platform (GCP)   VPS Management

Docker   DevOps Fundamentals

Tools & Platforms

Jira   Confluence   Figma   Miro   Trello

Notion   Google Analytics   Slack   Linear

Postman

Professional Experience

Technical Product Manager (AI Systems)
Resgata.ai • October 2024 – Present • São Paulo, Brazil (Remote)

Leading technical product development for a revolutionary 100% AI-powered fintech where autonomous agents execute the complete customer journey without human intervention.

- **Autonomous AI System Architecture:** Designed and deployed end-to-end AI agent ecosystem processing prospecting, customer service, sales, contract processing, and fund disbursement fully autonomously—eliminating human operational bottlenecks.
- **Infrastructure & DevOps:** Established Google Cloud Platform infrastructure through VPS management, defined API architecture in collaboration with development teams, and ensured scalability for rapid growth.
- **Machine Learning Operations (MLOps):** Actively manage custom LLM training pipeline, monitoring performance, implementing iterative improvements, and ensuring agent reliability in production.
- **Process Automation:** Engineered complex N8n workflows integrating CRM systems, payment platforms, and compliance checks—reducing manual processing time by 95%.
- **Front-End Development:** Constructed custom MVP dashboard enabling real-time AI performance monitoring and business KPI tracking, empowering executives with critical operational visibility.
- **Quality Assurance:** Implemented automated testing using Playwright to ensure AI workflow stability and prevent regressions in deployments.
- **Business Impact:** Joined as founding technical PM during MVP phase and transformed concept into revenue-generating functional operation in under 60 days, positioning company for market validation and accelerated growth.

Senior Product Owner (AI Product Focus)
Corlabs Holding • February 2024 – October 2024 • São Paulo, Brazil (Remote)

Product leadership for a venture builder ecosystem, managing the lifecycle of multiple AI-driven startups (Corbee, Trustic, Bankerise, Demandei).

- **Portfolio Optimization:** Formulated proprietary pricing methodology based on hours vs. volume, identifying deficit clients and restructuring the portfolio to focus only on high-margin contracts.
- **Strategic AI Automation with N8n:** Orchestrated deployment of automation workflows integrating CRM systems with Generative AI endpoints, reducing operational load for repetitive tasks by approximately 30%.
- **Multi-Product Backlog Management:** Served as PO for 4 distinct products simultaneously, prioritizing features based on business value (RICE Score) and technical feasibility.
- **Quality Transformation:** Introduced BDD (Behavior Driven Development) mindset and automated testing, elevating delivery quality and reducing rework.
- **Technical Bridge:** Worked closely with developers, leveraging knowledge of logic and APIs to rapidly unblock technical impediments and validate MVPs.

Independent Automation Developer & Consultant
AnthonyMax.com • January 2024 – Present • Remote

- Launched functional MVPs and automation solutions, validating market hypotheses in rapid cycles using Lean Startup methodology.
- Designed responsive web interfaces and integrated systems via REST APIs.
- Advised on AI agent implementation for administrative task automation.

Professional Experience (Continued)

Front-End Developer & UX Specialist
Max Web & Apps • January 2023 – January 2024 • Canela, Brazil

- Built complex user interfaces using HTML5, CSS3, and JavaScript, ensuring responsiveness and accessibility.
- Collaborated with designers and back-end developers to implement scalable Design Systems, ensuring visual consistency across platforms.
- Executed usability testing and QA, ensuring friction-free user experience.

Digital Designer & Web Creator
International Freelance • January 2018 – December 2022 • Portugal & Brazil

- Managed digital design and web projects for diverse portfolio of European clients, developing intercultural sensitivity and adaptability.
- Led visual conception of digital products, focusing on user journey and functional aesthetics.

Industrial Project Manager
Gradmec Indústria e Comércio Ltda • June 2012 – October 2019 • Brazil

- Managed complete lifecycle of high-complexity metallurgical projects, supervising budgets, schedules, and multidisciplinary teams.
- **Industrial Optimization:** Implemented real-time production metrics system, identifying bottlenecks by sector and rebalancing the line, resulting in direct output optimization and waste reduction.
- **Foundation for Product:** Experience grounding the capability to manage mission-critical projects, resource allocation, and demanding stakeholders.

Early Career

- **PCP Planner** │ GHR Engenharia (2012-2013)
- **Project Assistant** │ Mecmont Indústria (2008-2012)
- **Administrative Assistant** │ Mecmont Indústria (2006-2008)

Certifications

- **Professional Scrum Product Owner I (PSPO I)** │ Scrum.org - *Globally recognized certification validating advanced Scrum framework mastery and value maximization*

- **Google Project Management Professional Certificate** │ Coursera/Google - *Comprehensive training in Agile, Waterfall, and modern project execution methodologies*

- **Project Management Professional (PMP)® Certification** │ Veduca - *Professional project management certification*

- **Product Management Training Program** │ Alura - *Complete training in digital product management*

- **QA Career Path: Processes and Test Automation** │ Alura - *Including Robot Framework (BDD), Cypress, and E2E automation*

- **Technical Development Tracks** │ Alura (Premier Tech Platform in LatAm) - *HTML/CSS, Figma, UX/UI Design, Python, and Machine Learning*

- **EF SET English Certificate** │ Score: 75/100 - *Professional proficiency in technical documentation and written communication*

Education

Post-Graduate Degree in IT Management

Faculdade Iguaçu • 2023 - 2024

Focus: IT Strategic Planning, IT Governance (COBIT/ITIL), and Digital Transformation.

Bachelor's Degree in Marketing Management

UniRitter • 2023 - 2024

Focus: Strategic Marketing, Consumer Behavior Analysis, and Market Research.

Languages

🇧🇷 **Portuguese:** Native   🇺🇸 **English:** Level B1   🇪🇸 **Spanish:** Level A1   🇩🇪 **German:** Level A1

Key Projects

Agenda 2 (AI ERP) (2024)

https://agenda2.com.br/

ERP for clinics with WhatsApp secretary and internal assistant, achieving 100% scheduling automation.

Corporate Flight Search (2024)

https://voos.anthonymax.com/

Streamlined flight search system for employees via WhatsApp, eliminating manual search.

Zimago (Ad Management) (2023)

https://zimago.com.br/

Android app and web platform for offline media management on TVs, with offline-first functionality.

WP Message Platform (2023)

https://wp.anthonymax.com

Mass messaging platform for WhatsApp campaigns using the official API.

Cria Roteiro (2024)

https://criaroteiro.com

AI-powered travel itinerary generator (SaaS MVP) for personalized trip planning.

Finance App (2023)

https://financas.anthonymax.com

Free personal finance management application for expense tracking.
